

# — HIGH-PERFORMANCE CRANE ROPE — **INSPECTION TOOL KITS**

Wire rope inspection is a vital part of the maintenance process for any construction or crane company because the safety of your workers and secure delivery of lifted loads is of utmost importance.

To make sure your inspectors have everything they need to properly inspect high-performance crane ropes, we provide customized kits that include:

**1**

Custom sheave gauges that measure from 15 mm to 36.5 mm and are machined to specific tolerances to ensure accuracy

**2**

Special wide-jaw calipers to ensure proper measurement of wire rope in the field

**3**

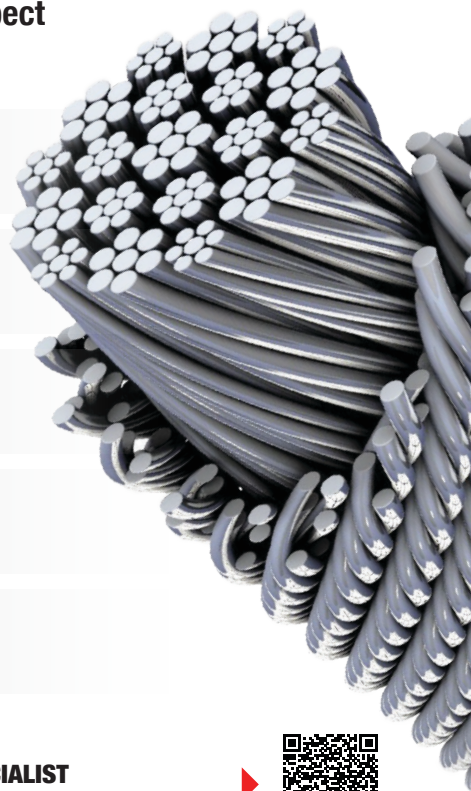

Pick set for inspecting in between the wire rope strands and checking for tightness

**4**

Metric steel rulers to measure waviness and kinks

**5**

Metric tape measure
